* Submit a copy of the General Contractor's Liability and Workers Compensation Insurance Certificate and Campbell County Occupational License.

3. ESTIMATED COST OF POOL & ENCLOSURE _____

4. POOL DIMENSIONS

Length _____ ft. Width _____ ft. Diameter _____ ft. Max. Depth _____ ft.

5. TYPE OF ENCLOSURE

- ☐ Fence around yard with self-closing and self-latching gate(s) Height of Fence: _____ inches
- ☐ Chain Link
 - ☐ Vertical pickets (maximum 4 inch spacing between pickets)
 - ☐ Solid Privacy fence (maximum 8 feet in height)
 - ☐ Split Rail or board fence with horizontal rails (must have attached wire liner)
 - ☐ Other _____
- ☐ Deck enclosure with self-closing and self-latching gates (deck permit also required)

Pool and Enclosure Specifications

1. Pools and deck enclosures must meet the minimum setback requirements
2. Temporary or permanent enclosure must be installed immediately after excavation for in ground pool
3. The enclosure shall comply with the attached section AG105 of the 2007 Kentucky Residential Code

Required Electrical Inspections

1. An electrical bonding inspection must be performed on all swimming pools.
2. In-ground pools shall also have an electrical inspection before they are backfilled.
3. Any electrical wiring associated with pool lights or pumps shall be inspected according to the National Electrical Code, Section 680.

Electrical Inspectors:

Charles Hetzel (859) 291-8009

Tom Studer (859) 431-0777

Steve Helmer (859) 746-9111

Required Final Inspection

Swimming pools may not be filled with more than 23 inches of water until the proper enclosure has been constructed.

The required enclosure must be in place and a final inspection by the Campbell County Building Inspector is required prior to placing the pool in service to ensure the electrical inspection has been completed and that these requirements have been complied with.

APPLICANT SIGNATURE I hereby certify that the information contained in this application and attachments is true and correct and that any misrepresentations or misstatement of facts shall be grounds for denial or revocation of the permit.

2007 Kentucky Residential Code

SECTION AG105 BARRIER REQUIREMENTS for residential in-ground swimming pools

AG105.1 Application. The provisions of this chapter shall control the design of barriers for residential in-ground swimming pools. These design controls are intended to provide protection against potential drownings and near drownings by restricting access to swimming pools.

AG105.2 Outdoor swimming pool. An outdoor in-ground swimming pool shall be surrounded by a barrier which shall comply with the following:

1. The top of the barrier shall be at least 48 inches (1219mm) above grade measured on the side of the barrier which faces away from the swimming pool. The maximum vertical clearance between grade and the bottom of the barrier shall be 2 inches (51mm) measured on the side of the barrier which faces away from the swimming pool. Where the top of the pool structure is above grade, such as an above-ground pool, the barrier may be at ground level, such as the pool structure, or mounted on top of the pool structure, the maximum vertical clearance between the top of the pool structure and the bottom of the barrier shall be 4 inches (102MM)
2. Openings in the barrier shall not allow passage of a 4 inch diameter. (102mm) sphere.
3. Solid barriers which do not have openings, such as a masonry or stone wall, shall not contain indentations or protrusions except for normal construction tolerances and tooled masonry joints.
4. Where the barrier is composed of horizontal and vertical members and the distance between the tops of the horizontal members is less than 45 inches (1143MM), the horizontal members shall be located on the swimming pool side of the fence. Spacing between vertical members shall not exceed 1 $\frac{3}{4}$ inches (44mm) in width. Where there are decorative cutouts within vertical members, spacing within the cutouts shall not exceed 1 $\frac{3}{4}$ inches (44mm) in width.
5. Where the barrier is composed of horizontal and vertical members and the distance between the tops of the horizontal members is 45 inches (1143) or more, spacing between vertical members shall not exceed 4 inches (102mm). Where there are decorative cutouts within vertical members, spacing within the cutouts shall not exceed 1 $\frac{3}{4}$ inches (44mm) in width.
6. Maximum mesh size for chain link fences shall be a 1 $\frac{1}{4}$ inch (32 mm) square unless the fence is provided with slats fastened at the top or the bottom which reduce the openings to not less than 1 $\frac{3}{4}$ inches (44 mm).
7. Where the barrier is composed of diagonal members, such as a lattice fence, the maximum opening formed by the diagonal members shall not be more than 1 $\frac{3}{4}$ inches (4mm).
8. Access gates shall comply with the requirements of Section AG105.2, Items 1 through 7, and shall be equipped to accommodate a locking device. Pedestrian access gates shall open outward away from the pool and shall be self-closing and have a self-latching device. Gates other than pedestrian access gates shall have a self-latching device. Where the release mechanism of the self-latching device is located less than 54 inches (1372mm) from the bottom of the gate, the release mechanism and openings shall comply with the following:
 - 8-1. The release mechanism shall be located on the pool side of the gate at least 3 inches (76mm) below the top of the gate: and
 - 8-2. The gate and barrier shall have no opening larger than $\frac{1}{2}$ inch (13 mm) within 18 inches (457MM) of the release mechanism.

AG105.4 Prohibited locations. Barriers shall be located to prohibit permanent structures, equipment or similar objects from being used to climb them.
